

A Reliable Computer Network

What pieces are you missing?

OR

Virtualized Servers

Servers running as virtual machines sharing storage from a SAS or iSCSI connected Storage Area Network

Server

Network file, printer and application server with redundant hard drives.

UTM Firewall

For immediate virus, hacking, spam, and spyware detection as well as web filtering.

Alert Monitoring

Review of all server, backup, firewall, and ups alerts.

Backup of files and Disaster Recovery Options

- Hard Drive Images of Servers and Workstations
- Shadow Copies on Servers for quick and easy restores
- Replication and Recovery to a different computer
- Offsite Backup
